RUMORS OF PEACE AGAIN. Nothing Is Transpiring at the Seat of War In South Africa.

LONDON, March 7 .- For lack of news from Field Marshal Lord Roberts, attention tunns to Natal. It is reported that General Builer has pushed forward a force along the Harrismith railroad line toward Van Reenen's pass, using the railroad freely for communications.

It appears that the Boers intend to take up a strong position in the Biggaraberg range and contest the Glencoe passes. General Baller's plans, however, are kept almost as secret as those of Lord Roberts

While waiting for the important developments which are daily expected to occur in the Free State rulners of peace

The Tunes today contains a dispatch from Cane Town which says there is a crowning need for an explicit statement by the Eritish ministry that nothing short of annexation is intended in order to "dring the mischievons agitation demand for peace

ROBERTS VERY CONFIDENT. Has the Enamy In Full Retreat to the

North and East.

LONDON, March 7. - Field Marshal Lord Roberts has telegraphed as foilows from Osfontein, March 7:

"Our operations today promise to be a great success. The enemy occupied a position 4 miles north and 11 miles south of the Modder river.

"I placed General Colville's division on the north bank and General Kally. Kenny's and Tucker's divisions, with cavalry, on the south. The cavalry division succeeded in turning the enemy's left flank, opening a road for the Sixth division, which is advancing without having been obliged to fire a shot up to the present time.

The enemy are in full retreat towards the north and east, closely followed by cavalry, horse artillery and mounted infaniry, while Tucker's Seventh division, Co ville's Ninth division and the guard's brigade, under Pole-Carew, are making their way across the river at Poplar's drift, where I propose to place my headquarters this evening.

#### POPULAR SCIENCE.

Professor Agassiz has discovered that there is no deep sea life except in currents and adjacent to land.

There are in the world's oceans 7,000,-000 cubic miles of salt, and if all this salt could be taken out in a moment the level of the water would not drop one single

Formaldehyde vapor has been successfully used by M. Camille Sumeire in Mauritius for preserving specimens of animals. A guinen pig was kept fresh for 20 days, and the far was uninjured by the vapor.

Science has lately made it possible to obtain good wine from the apple, which has always been devoted to sparkling cider. Experts have been deceived in sherry, madeira and sauterne which came from apple jules instead of grapes.
